

## Appendix A: ASCII Characters

ASCII stands for American Standard Code for Information Interchange (ASCII). It defines the 7-bit encoding standard for 128 characters, including 33 control characters (0x00-0x19, plus 0x7F) and 95 printable characters (0x20-0x7E). The ASCII value 0x20 represents the space character, which is a printable character. The first ASCII was published in 1963, and many control characters have become obsolete. However, computers still use ASCII to store text documents and data, such as C or assembly programs.

Dec	Hex	Char	Dec	Hex	Char	Dec	Hex	Char	Dec	Hex	Char
