

ECE435: Network Engineering – Homework 9
Ethernet Cables

Due: In class Tuesday, 14 November 2017, 12:30pm

This will take place during normal class time, but in Barrows 28 (In the basement, go down the steps by the IEEE lounge).

Hopefully a TA will be there to let you in.

In this activity, you will create an Ethernet cable.

1. This homework document is mostly a place holder. Follow the directions given to you by the TA to make a cat6 cable.
2. Once you are done, be sure to sign the signoff sheet saying you were there.
