

ECE571: Advanced Microprocessor Design – Homework 9
Spring 2017

Due: Thursday 13 April 2016, 11am

Create a document that contains the answers to the questions below. A .pdf or .txt file is preferred but I can accept MS Office or Libreoffice format if necessary.

1. Read the following article:

- **A Validation of DRAM RAPL Power Measurements**

by Desrochers, Paradis and Weaver

http://web.eece.maine.edu/~vweaver/projects/rapl/2016_memsys_rapl.pdf
(warning, it's a large 13MB download, large graphs)

2. Answer the following questions:

- (a) What kind of sensor was using for measuring actual DRAM power?
- (b) What tool was used to measure RAPL results?
- (c) Did the actual results match the DRAM results?
- (d) Why is it harder to measure DDR4 power than DDR3 power?
- (e) What additional experiments do you think could be run that would make this paper better?

3. Submitting your work.

- Create the document containing the answers to the questions asked.
- Please make sure your name appears in the document.
- e-mail the file to me by the homework deadline.
