

ECE 417 --- ROBOTICS

Homework 5, Spring 2021

1. Convert the matrix \mathbf{R} (aka ${}^{xyz}\mathbf{R}_{uvw}$) of Homework 1 to System II Euler angles (2 solutions)
2. Convert the matrix \mathbf{R} (aka ${}^{xyz}\mathbf{R}_{uvw}$) of Homework 1 to axis-angle form (2 solutions)
3. Convert System II Euler angles $(90^\circ, 90^\circ, 90^\circ)^T$ to a 3x3 rotation matrix
4. Convert System II Euler angles $(30^\circ, 60^\circ, 90^\circ)^T$ to a 3x3 rotation matrix
5. Convert axis-angle given by a rotation of 120° about an axis through $(1, -1, 1)^T$ to a 3x3 rotation matrix. (Remember to normalize the vector first.)
6. For a rotation about the X axis by 90° , convert to
 - a. System II Euler angles (2 solutions)
 - b. Axis-angle form (2 solutions)
 - c. A 3x3 rotation matrix
